

The Argon Family of
PICC and Midline Catheters

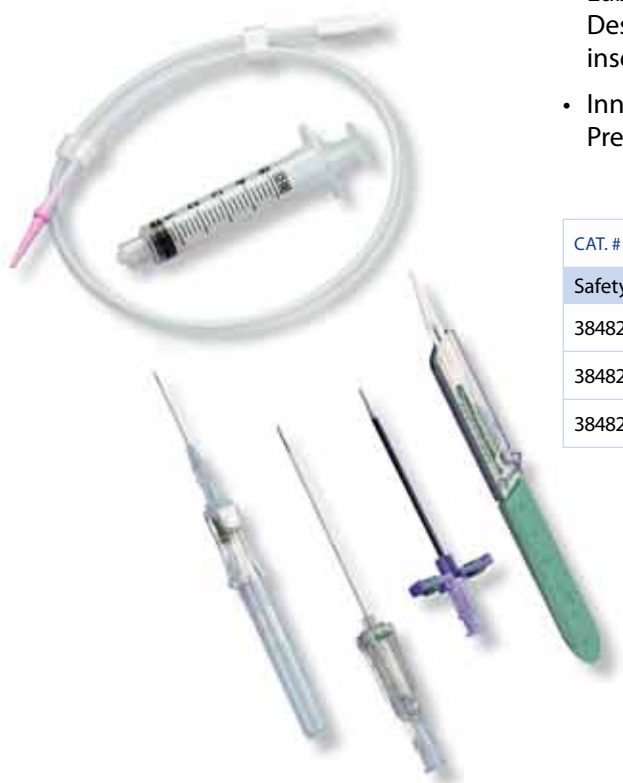

Providing
Optimal Outcomes
for Long-Term
& Intermediate Therapies

Safety MST Accessory Kits for PICC and Midline Placement Using the Modified Seldinger Technique

Safety MST Accessory Kits incorporate the highest-quality safety components. Each kit includes the following:

- Insyte™ Autoguard™ shielded IV catheter
Proven in one study to reduce IV stylet-related injuries by 95%¹
- Echogenic-tipped, protected needle
Safety needle-introduction when an ultrasound placement is preferred
- Bard-Parker™ safety-engineered protected disposable scalpel
For a modified Seldinger technique
- Marked 5 cm guidewire
Clearly identified 5 cm increments for easy determination of guidewire insertion length
- Lubricated, tapered-tip sheath dilator
Designed to decrease insertion force and to allow for easier insertion with less trauma to the patient
- Inner sterile package
Prevents kit components from accidental contamination

L-Cath™ Polyurethane Catheters for PICC and Midline Catheters

Polyurethane material provides strength and increased flow rates.

L-Cath™ PICC and Midline Catheters are designed for safe and easy placement.

L-Cath™ Polyurethane Catheters

Breadth of line and familiarity you were trained on

- Universal application
Breadth of line offers access options for neonate to geriatric patient populations
- Preattached Y-site
Preattached Y-site connector allows flushing of catheter before, during, and after the insertion
- Protective sleeve
Designed to minimize accidental contamination of the catheter
- Trimming tool
Catheter trim tool is designed to ensure clean and accurate trimming and provides a 90° cut consistent with FDA recommendation
- Latex and DEHP free

Polyurethane Catheters

Silicone Catheters

Breadth of line and reliability you can count on

First PICC™ and First Midcath™ Catheters

First PICC™ and First Midcath™ Catheters are high-quality silicone catheters designed for safe and easy placement.

- Universal application
Breadth of line offers access options for neonate to geriatric patient populations
- Soft silicone integrated extension set
Designed to enhance patient comfort and to provide increased mobility
- Preattached T-port extension
Allows flushing of the catheter before and after insertion
- Protective sleeve
Designed to minimize accidental contamination of the catheter
- Numbered catheter markings
Designed to allow easy measurement and catheter trimming prior to insertion
- Trimming tool
Catheter trim tool is designed to ensure clean and accurate trimming and provides a 90° cut consistent with FDA recommendation
- Latex and DEHP free

CAT. #	DESCRIPTION	EA/CS
PROCEDURE TRAYS		
384825	Complete Procedure Tray – Neonatal/Infant PICC or Midline	
CONTENTS:		
1 Face mask with eye shield	1 Tourniquet	
1 Tape measure	2 4"x 4" absorbent pads	1 Roll Transpore® tape
2 Poly-lined drape	2 2"x 2" absorbent pads	1 Skin protectant swabstick
1 Fenestrated drape	1 syringe, 10 cc	1 Tegaderm® HP transparent dressing
1 Iodophor PVP swabsticks (3 per pack)	1 Scissors	1 Extension set
1 Alcohol swabsticks (3 per pack)	1 Forceps, with tip protection	
1 Sterile normal saline wipe	3 Foam tape strips	
5 EA/CS		
384826	Intermediate Procedure Tray – Adult/Pediatric PICC or Midline	
CONTENTS:		
2 Isolation masks	1 Tourniquet	
1 Tape measure	4 4"x 4" absorbent pads	1 Roll Transpore® tape
1 Poly-lined drape	2 2"x 2" absorbent pads	1 Skin protectant swabstick
1 Fenestrated drape	2 Syringes, 10 cc	1 Tegaderm® HP transparent dressing
1 Iodophor PVP swabsticks (3 per pack)	1 Scissors	
1 Alcohol swabsticks (3 per pack)	1 Forceps, with tip protection	
1 Sterile normal saline wipe	4 Foam tape strips	
5 EA/CS		
384827	Complete Procedure Tray – Adult/Pediatric PICC or Midline	
CONTENTS:		
1 Face mask with eye shield	4 4"x 4" absorbent pads	1 Tegaderm® HP transparent dressing
1 Isolation mask	2 2"x 2" absorbent pads	2 Gloves
1 Tape measure	2 Syringes, 10 cc	1 BD SafetyGlide™ syringe with needle, 1 cc
1 Poly-lined drape	1 Scissors	2 Ampules, 10 mL sodium chloride 0.9%
1 Fenestrated drape	1 Forceps, with tip protection	1 Filter straw
1 Iodophor PVP swabsticks (3 per pack)	4 Foam tape strips	1 Extension set
1 Alcohol swabsticks (3 per pack)	1 Roll Transpore® tape	1 StatLock® catheter securement device pack
1 Sterile normal saline wipe	1 Skin protectant swabstick	
1 Tourniquet		
5 EA/CS		

Neonatal/Pediatric Introducers and Catheters

Argon Neonatal/Pediatric introducers and catheters are designed specifically for this patient population.

Clinician options

- Silicone catheter designed with soft, integrated extension set to enhance patient comfort
- Polyurethane catheter available in sizes for this population
- Safety and nonsafety introducers with features designed to enhance first-stick proficiency
- Availability of procedure tray configuration as a stand-alone or in a kit

Neonatal/Pediatric Introducers and Catheters

Clinical Education

Setting the standards of excellence

Clinical Education

In today's challenging clinical environment, educational support is paramount. Argon offers a wide range of programs using a variety of technologies including interactive CD-ROMs. All of our programs are accredited for continuing education credits.

Argon Educational Offerings Include:

- Extended Dwell Peripheral Catheters for Adult and Pediatric Patients
- Extended Dwell Peripheral Catheters for the Neonate
- Advanced Workshops to Expand your Competencies
- Care and Maintenance of Extended Dwell Catheters

Argon Medical Devices, Clinical Resource Services Department is accredited as a provider of continuing education in nursing by the American Nurses Credentialing Center's Commission on Accreditation and the California Board of Registered Nursing.
