iodine, but not limited to, to the transmission of infectious diseases from one patient to another. The Manufacturer or its Distributor is not responsible for any direct, incidental or consequential damages other than as expressly provided by specific law. No person has the authority to bind the Manufacturer or its Distributor to any representation or warranty except as specifically set forth herein.

I. Device Description

The Option™ ELITE Filter is designed for the prevention of recurrent pulmonary embolism via percutaneous delivery in the inferior vena cava (IVC).

II. Indications For Use

The Option™ ELITE Filter is indicated for the prevention of recurrent pulmonary embolism (PE) via percutaneous delivery in the inferior vena cava (IVC).
V. Potential Complications

Procedures requiring percutaneous interventional techniques should not be attempted by physicians who are not familiar with the technique. The physician should also be familiar with any local variations of the technique. The potential complications included in the following sections are not all-inclusive, the following:

- Vena cava tear or injury
- Fractures
- Venous or arterial dissection
- Thrombosis
- Thromboembolism
- Perforation
- Malposition
- Spasm
