from Clinical Training room

Fit for Purpose Fit for Future

The ADEC facility supports Argon's global ESG (Environmental, Social, Governance) strategy that commits to conducting business responsibly and ethically, reducing environmental impact, conserving energy, supporting employees and local communities.

The building was designed with sustainability at its core and constructed to the environmental building certification of Excellent under BREEAM accreditation. The BREEAM accreditation evaluates construction materials used and where they are sourced, correct waste disposal, emissions used during construction process, hazardous material handling, and energy efficiency rating of mechanical equipment such as heating & cooling systems.

Sustainable Operations

- ▶ Shipping boxes: made from **70–100% recycled material**, fully recyclable & biodegradable; FSC-certified suppliers
- ▶ All new packaging is chosen with **recyclable/sustainable criteria** where possible
- ▶ Plastic packaging: minimum **30% recycled content**, fully recyclable
- ▶ **100% paper document wallets** for all shipments

Building Sustainability Features

Building Materials and Certifications

▶ BREEAM rating:
EXCELLENT
*Pending final assessment

▶ Carpet tiles:
80% RECYCLED CONTENT

▶ Acoustic panels:
75% RECYCLED PET FIBRE

Energy & Infrastructure

▶ **36 SOLAR PANELS**
15.84 kWp, producing
13–14 MWh annually

▶ **ALL-LED LIGHTING**
warehouse uses daylight
+ occupancy sensors

▶ **EV CHARGING**
4 x 7kWh chargers
supporting EV adoption
